°Appointed June 15, 1925, in place of Harvey R. Kingsley, resigned.

+Appointed December 21, 1925, in place of Charles E. Davis, resigned. Elected March 2, 1926.

Report of the Mayor

To the Citizens of Rutland:

It is with regret that I have to state that the City ended the year of 1931 with a deficit of \$23,550.68.

This was caused almost entirely by the development of a general unemployment emergency beyond local control, and which caused unprecedented expense in the Department of Charities and Corrections.

That department has been very thorough and painstaking in its efforts to provide for the incapacitated needy and for emergency relief.

The Department of Public Works has been most energetic and helpful in providing "make work" projects for the employment of those in need and able to work.

I believe that no needy resident of Rutland, incapacitated or otherwise, has suffered for the want of food and fuel.

I wish at this time to thank the local chapter of the American Red Cross for their co-operation in providing necessary clothing for the men on the "make work" projects. Most of these men have been former shop employees or of a class that has been out of work for some time. Nearly all were very poorly equipped for outdoor manual labor in the middle of winter. They can now perform the work offered without unnecessary suffering or illness.

I am inclined to think that we may have an unemployment situation in this city, in some degree, for two or three years.

While it may seem best to have an issue of bonds of sufficient amount to enable the City to take care of this condition, through "make work" projects or direct relief, I feel, personally, that it is better business and better for the City, to raise money from taxes each year to take care of current emergencies than to issue bonds for the purpose.

In considering this matter of finances, it should be kept in mind that on December 31, 1928, the City had a surplus of \$50,602.91. This was exhausted during 1929 and 1930 because the tax rate for those years was not high enough to pro-

duce sufficient funds to pay the operating expenses of the City, which, in 1930 especially, were increased by the development of the unemployment situation.

I wish to thank the Board of Aldermen for the co-operation received from them, and the heads of all the City departments, and the men working under them, for their loyalty to the City during the year 1931.

Respectfully submitted,

ARTHUR W. PERKINS,
Mayor

Report of City Treasurer

To the Honorable City Council:

Gentlemen:—

I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1931.

Report of Commissioner of Public Works

To the Honorable City Council:

Gentlemen:

In accordance with the provisions of the City Charter, I submit herewith, the annual report of the Commissioner of Public Works, for the year ending December 31st, 1931.

ORGANIZATION

Commissioner of Public Works, City Engineer,
and Superintendent of Streets R. H. Royce
Assistant Engineer E. L. Tracy
Assistant Engineer W. K. Nichols
Superintendent of Water Works E. S. Beardsley
General Superintendent J. T. McLaughlin
Clerk T. A. Reardon

STREET DEPARTMENT

Killington Avenue was paved with concrete from the existing concrete on South Main Street to the east end of the Church property. One-half the cost was paid by the Church for their frontage, and one-half by the city. The paving, done between the east line of Main Street and the existing concrete in Main Street, was paid for by the city. The concrete ramp, from the south edge of the pavement on Killington Avenue to the sidewalk, was paid for by the Church. Curbing was also laid around the intersections, and on the north side of Killington Avenue.

Wales Street pavement, between Washington and Center Streets, was widened with three feet of concrete and a double curb was built along the east side.

Concrete curbs and gutters were built in front of the Longfellow School building on the west side of Church Street and north side of West Street; on Crescent Street, between Lincoln Boulevard and Church Street; in front of the Dana School on the east side of East Street and the north side of East Center Street; on the west side of North Main Street, from Kendall

Avenue to Roberts Avenue; and on Curtis Avenue, from South Main Street to near the Fire Clay Company buildings. These were built on a one-half cost basis with the property owners. Because of the narrow width of the pavement on Curtis Avenue (12 ft.), the combined curb and gutter was set back a foot from each edge of the pavement, and the extra concrete to fill this in was paid for in full by the property owners.

Snow removal costs were high in 1931 in spite of the fact that the last part of the year was singularly free from snow. The bulk of the costs (about \$4,000) was caused by one storm in March, which will be remembered for some time as the most destructive one of its kind in years.

Several exceptionally severe thunderstorms, of almost cloud burst proportions, caused much damage to the streets in general, and to the hill streets in particular.

Gravelling of streets was carried on intermittently as opportunity arose, and 8,848 cubic yards were placed, which is equivalent to 4.82 miles of 18 foot road.

The stone crusher and quarry on Pine Hill started operations May 27th and 4,770 tons of stone were crushed up to, and including, December 31st, costing approximately \$1.91 per ton. This is a considerable decrease over the 1930 costs and is mostly due to plant repairs made in 1930.

The street oiling this year was done on a non-assessment basis following a change in the City Charter, and 70,036 gallons of No. 55 asphaltic road oil, and 4,000 gallons of Tarmac were applied by pressure distributors on various streets in the city. Several streets received a calcium chloride treatment.

Water sprinkling was done as usual in the business district by means of an antiquated horse drawn flusher.

Several, larger than usual, grading and widening jobs were done, such as Royce Street, where the roadway had to be materially altered to conform with the new curbing; the upper end of Baxter Street, where a narrow, one-way road has been widened and filled; Watkins Avenue, where a boulder strewn pasture has been graded preparatory to gravelling, and Field Avenue, where a considerable amount of ledge has been removed and the road widened and gravelled.

This department moved about 30,000 volumes from the Memorial Hall library to Longfellow School, and took down and stored the racks and equipment.

Depot Park drives were shaped up and gravelled, by the street department, at the expense of the Railroad Company.

The tractor, road machine, and steam roller were in use practically every day, weather permitting, shaping and grading various streets, and a patrol crew was kept busy all season patching holes that traffic and service cuts made in streets.

The various trucks concrete mixers, pumps, power shovel, tractor, roller, road machine, street flusher, crushers, motors and other equipment were repaired and maintained by this department in the city garage.

After the blizzard in March, a survey made of city trees showed many badly damaged and many that should be removed, trimmed, or repaired and a great deal of work was done of this nature by a tree surgeon. This work was charged against the general department; but it was paid for by the street account.

SEWER DEPARTMENT

There were 19 new manholes built and one repaired; and 26 new catch basins were built and 16 repaired.

The following sewers were constructed in 1931: In Bellevue Avenue, starting at a manhole in Temple Street, thence northerly on Bellevue Avenue center line, 200 ft. of 8 in. pipe.

In Cottage Street, starting at a manhole south of No. 12 Cottage Street, to which point the pipe was laid in 1916, thence northerly, 618 ft. of 8 in. pipe, to a manhole opposite No. 34 Cottage Street; mostly ledge excavation.

In Highland Avenue, starting at a point opposite No. 6, to which point the pipe was laid in 1916, thence southerly; 78 ft. of 8 in. pipe.

In Hopkins Street, starting at a manhole, opposite about midway between No. 6 and No. 8 Hopkins, thence easterly; 60 ft. of 8 in. pipe.

In Killington Avenue, starting at Lafayette Street, thence easterly 1,354 ft. of 18 in. pipe to a manhole over the Moon Brook trunk sewer. From this point, 134 feet of 12 in. pipe

was laid to the brook to act as a storm water overflow. The old 8 in. line of sewer pipe in the south side of the street was discontinued, and house connections thereto were relaid to the new 18 in. sewer.

In Litchfield Avenue, starting at a point in the center line of Litchfield Avenue, about 3 ft. south of the north line of No. 55 Litchfield, thence northerly; 100 ft. of 8 in. pipe.

In Nichols Street, starting at a manhole in the West Street sewer, thence northerly 291 ft. of 12 in. pipe to a manhole, thence northerly 291 ft. of 10 in. pipe to a point nearly opposite the north line of No. 29 Nichols Street.

In North Main Street, starting at a point 18 feet south of a new manhole built opposite No. 261 North Main Street, thence northerly 734 ft. of 8 in. pipe to a point opposite "The Ledges."

In Oak Street, starting at a point opposite the middle of No. 137 Geno Avenue, thence westerly, 60 ft. of 8 in. pipe.

In River Street a new job was started, to run easterly from Otter Creek, on December 31st; but no pipe was laid in 1931. See 1932 report.

In Watkins Avenue, starting at a point in the center line of Watkins Avenue, just south of No. 47 Watkins Avenue, thence northerly 1,200 feet of 8 in. pipe on the center line to a point south of the Billings residence.

SIDEWALK DEPARTMENT

The appropriation for sidewalks this year was double that of previous years, but due to the depression the petitions fell off, and late in the summer all back petitions to date had been taken care of; and the balance of the appropriations was then transferred, by vote of the Aldermen, to the sewer account to keep men working and do necessary sewer work. Since that time some petitions have come in, but not as many as usual. At present the petitions on file will only require about 3 weeks' work.

This year there were 50,007 $\frac{1}{4}$ square feet of cement concrete laid which are equivalent to about 1.9 miles of 5 ft. walk.

GENERAL DEPARTMENT

It was originally planned to build a single span steel bridge over East Creek on West Street, but after learning that we could not receive as much state aid as had been previously anticipated, the plans were re-drawn, and a two span concrete T-beam bridge, with a 20 ft. roadway and 5 ft. walk, was built in accordance with Vermont State specifications. The total cost of this bridge, up to December 31, 1931, was \$8,045.30. There remains to be done some stripping of forms, guardrails at the approaches, cleaning up, etc.

Bridge repairs were not extensive this year, the most costly one being the replacement of some of the cement casing on the girders of River Street viaduct, over the main tracks of the Rutland Railroad. The casing was loosened by blasts from locomotive smoke stacks, and repairs were made from a staging by using a cement gun.

This department set up the chute at the swimming pool, maintained the city dump and parks, conducted the annual clean-up week, set up and took down election booths, built a fence around and cut grass at the West Street Cemetery, set street signs, supervised the Pine Hill make-work job, widened the city garage doors, paid for injuries to employees, holidays and vacations of straight time men, did work in the City Hall, repaired and painted guardrails, and did various other miscellaneous jobs of like nature.

TRUNK SEWER BOND DEPARTMENT

The construction of a storm water overflow and trunk sewer from East Creek to Pine Street followed a vote to bond the city for \$50,000 for this purpose.

Following recommendations made by the engineering firm of Fay, Spofford and Thorndike, designers of the recently built Lake Champlain Bridge, detailed plans were made here of the construction work.

Starting with a concrete outfall at East Creek, and running thence easterly along the line of an old, abandoned, cobblestone sewer to Meadow Street, and passing between houses No. 29 and No. 31 Meadow Street, the sewer was of the box type, with interior dimensions of 5 ft by 6 ft. 6 in. In Meadow

Street, where the 36 in. brick sewer running southerly in Meadow Street crosses it, a 16 in. cast iron pipe, making an inverted syphon under the new sewer, was laid to take the dry weather flow, and a weir was built so as to spill the storm water over into the new box type sewer during heavy rain-falls. From this point on, the new sewer was of the circular type of poured-in-place concrete, with an internal diameter of 5 ft. From the syphon at the corner of Meadow Street and Blanchard Ave., (formerly known as School Street), the 5 ft. sewer runs to Forest Street, thence northerly in Forest Street to Pine Street, and thence northeasterly in Pine Street to a terminal manhole, opposite Grimm's Factory, on the end of the 57 in. sewer coming down from West Street. The total length of the job was 1750 feet, and about 50 ft. remained to be completed at the end of the year. The cost, to December 31, 1931 inclusive, was \$35,594.21, which includes the engineering fees, sale of bonds, equipment rental and maintenance, purchase of right of way, crop damage, etc. The approximate cost when the job is completed early in 1932 will run about \$21.00 per lineal job. Complete unit costs have not yet been compiled, but will be available shortly after the completion of the work in 1932.

EMERGENCY "MAKE-WORK"

In order to relieve unemployment conditions this fall, \$3,000 was appropriated for the purpose of doing work in Carpenter Park on Pine Hill. From 30 to 45 men have been employed in this project, and have been clearing out trails, widening and grading roads, cutting cord wood, clearing out boundary lines, and removing entirely the brush growth and fire-killed trees. About 50 acres had been so cleaned by December 31st.

The assistant state forester, Mr. Bradder of this city, has been in touch with, and has given time and advice to the work.

It does not seem advisable to attempt to build and maintain automobile roads through the entire tract, nor to make it anything but what it is—a forest tract—but, it is the intention, if funds are available, to build a road for cars up into the park, from Evergreen Avenue to a cleared parking space, and another road from there to join Watkins Avenue. Cars would then be left at the parking space, and people could roam around the

cleared trails on foot, build fires for cooking meals in prepared, rock fireplaces, and enjoy the rustic surroundings.

WATER DEPARTMENT

During the year six new hydrants were set, four were raised, two were moved, and 26 were repaired. There were 13 6 in. and one 4 in. valves inserted in existing hydrant connections. Three 6 in. valves were also inserted in mains. A total of 56 valves, including one air valve were set on all jobs.

New Mains were laid as follows:

In Church Street, running southerly from Field Avenue 551 feet of 6 in. pipe, with two 6 in. valves.

In Field Avenue, from the Grove Street to the Lincoln Boulevard main, 1852.5 feet of 8 in. pipe with eight 8 in. valves.

In Highland Avenue, from the Temple Street main thence northerly 415.5 feet of 6 in. pipe with one 6 in. valve.

In Jackson Avenue, from a point about opposite No. 95, thence easterly crossing both brooks, to Stratton Road, 1604.5 feet of 6 in. pipe, with one 4 in. valve (on blow-off) and two 6 in. valves.

In Lincoln Avenue, at the corner of Grant Avenue, pipes were laid to connect existing dead ends, using 22.0 feet of 6 in. pipe, 103.0 feet of 4 in. pipe, and 3 feet of 3 in. pipe, with two 4 in., and one 3 in. valves.

In North Main Street, from Field Avenue, thence northerly 1194.5 feet of 6 in. pipe with two 6 in. valves.

In North Street Extension, from the west end of pipe previously laid east of Belmont Avenue, thence westerly 857.5 feet of 16 in. pipe to and across the existing main on Bellevue Avenue, with three 16 in. main, and one air valve.

In Ripley Road, starting at a hydrant near No. 13, thence southerly crossing Otter Creek, on the bridge, to the Creek Road, so called, thence easterly in the Creek Road a total distance of 1318 feet of 6 in. pipe with one 6 in. valve.

In Stratton Road, starting at Jackson Avenue, thence northerly 899 feet of 6 in. pipe with two 6 in. valves.

In Terrill Street, starting in Lafayette Street, thence westerly 225 feet of 6 in. pipe with two 6 in. valves.

In Vernon Street, from Grove Street easterly, 306 feet of 6 in. pipe with two 6 in. valves.

In Vernon Street, from Pearl Street easterly 187 feet of 6 in. pipe with one 6 in. valve.

Near Watkins Avenue, starting at a point in a recorded right-of-way between Watkins Avenue and Hazel Street, thence easterly in said right-of-way, 237.5 feet of 6 in. pipe with one 6 in. valve.

WATER FLOWING TO CITY AS RECORDED BY VENTURI METER 1931

Month	No. of days	Total gallons	Average gal. per day (24 hr.)	Average per capita per day (24 hr.)
January	31	89,280,000	2,880,000	166
February	28	81,390,000	2,907,000	168
March	31	86,580,000	2,793,000	161
April	23	60,790,000	2,643,000	153
May	31	82,620,000	2,665,000	154
June	29	79,060,000	2,726,000	158
July	31	87,210,000	2,813,000	162
August	31	88,230,000	2,846,000	164
September	23	68,120,000	2,962,000	171
October	30	81,020,000	2,701,000	156
November	30	78,810,000	2,627,000	152
December	31	87,270,000	2,815,000	162
	349	970,380,000	2,780,000	160

Population of the city: approximately 17,300.

The average consumption of water per person per day is 160 gallons. This is equivalent to 2,780,000 gallons daily, or 1,014,700,000 gallons yearly. The total annual receipts, both domestic and meter, for the sale of water were \$51,867.40. This makes the average cost of water 5 1-10 cents per 1,000 gallons as consumed by all classes.

During the year, 27 new copper services were laid, and 3 new cast iron services were laid at cost to the owners. There were 110 services repaired or relaid with copper pipe. During the summer, and following some complaints of the taste of the water, the reservoir was given a thorough cleaning. The Fire Department, very obligingly, assisted in this, and facilitated the work greatly. There were found some weeds growing in the

bottom of the reservoir which had a peculiar odor, and which may have been the cause of the taste referred to, although there is a possibility that, because of extremely dry weather conditions, the taste was caused, in part, at least, by stagnant water in some of the upland swamps on the water shed.

The annual reforestation program was carried out by planting 50,000 Norway Spruce, 1,000 of which were planted by boys from the Meldon School, under the direction of Mr. Sargent, Miss Purcell and Mr. Bergstrom.

As an experiment this year, 10,000 white ash were set out in ploughed furrows, in moist meadow land, and were all thriving at the end of the season. The planting was done with the advice of Mr. Bradder, assistant state forester, who has also made much progress in making a forest survey of most of the city-owned lands in Mendon.

During the year, some work was done in locating boundary lines, the description of which is, in many cases, extremely vague, and the records, correspondingly hazy. Progress was made on land surveys to eventually show, in detail and to scale, all city holdings.

During the year, following the recommendation of the Water Committee of the Board of Aldermen, a tract of land, about 200 acres in extent, was purchased, for \$1,000, from Rufus Blanchard. This plot is adjacent to, and on both sides of the so-called "Elbow Road," leading from the main Woodstock Road to Pittsfield.

PRECIPITATION FOR 1931 AT RUTLAND, VERMONT

Month	Snow	Rain	Total Prec.
January	19.6 in.		1.58 in.

	46.10 in.	34.22 in.	41.60 in.

ENGINEERING DEPARTMENT

The survey, design and drawing of plans for the new Trunk Sewer and Storm Water Overflow was the largest project handled by the Engineering Department during the year and required considerable time. The preliminary survey and design, prepared in this office, were reviewed and checked by Mr. Myott of Fay, Spofford & Thorndike of Boston, Mass. Following his report, the detailed construction plans were prepared by this department. The sewer is being built according to these plans. This department has charge of inspection of construction.

All other sewers were laid to conform with the "Proposed Sewer System" as planned in 1925.

The design of West Street bridge was based on the Vermont Highway Department standard plans. Detailed construction plans for the two span, reinforced concrete, T beam bridge were prepared in this office.

The concrete sidewalk construction, as usual, necessitated a great deal of work establishing street lines and grades. Curb and gutters, where constructed, were designed to fit future street improvements. The only permanent pavement constructed was on Killington Avenue near South Main Street. Curtis Avenue was widened and curbed, completing the project started in 1925.

In Mendon a survey was made of the roadway and adjacent territory beginning at the Rutland-Woodstock highway and going as far south as the "Notch." This will be extended when time permits and will serve as a control survey in tying together all of the parcels of land owned by the City in the town of Mendon. A map of this survey was prepared and with it were combined the surveys of City owned lands made by A. C. Grover, C. E., in Mendon. This will, in time, be a complete map of the City lands.

A survey to establish the street lines and also a detailed topographic survey was made of Gleason Road. Plans were prepared, according to which future developments will be made. The south end of Mussey Street was similarly surveyed.

Some work was done on Pine Hill, but as a previous survey had included nearly all details, the development work was able to proceed without additional plans.

Surface treatment of streets with oil was supervised by this department. This year it was not necessary to prepare a list of assessments as the cost of the work was carried by the Street Department.

Street lines and grades were given wherever requested by property owners.

Construction sheets for the Water and Sewer Departments, showing details of work done during the year, were drawn. These serve as permanent records of underground pipes.

The filing and indexing of plans and survey notes was kept up to date.

During the last two days of the year all property in the Public Works Department was inventoried.

RECOMMENDATIONS

As soon as recovery is made from the present depression, I would strongly urge the purchase of motorized street-cleaning equipment, for use at least in the business district.

In event of a bond issue to furnish unemployment relief, and give value for money spent, the enlargement of the present 18 in. trunk sewer along Moon Brook is recommended for your consideration. This present sewer, from its outfall near the junction of Moon Brook and Otter Creek, is but 18 in. in diameter to South Main Street; here it further decreases to 15 in. and again near Killington Avenue to 12 in. and, finally, at St. John Street, it is a 10 in. pipe. This system drains a large area and will require considerable preliminary work in preparation for actual construction.

State Street Bridge should be replaced with an adequate and permanent structure as soon as may be.

I believe it is advisable when the proper occasion arrives to cement the inside of our present reservoir; and to continue the present policy of laying no more small size water pipes; and to replace the smaller with larger ones from year to year. Also to continue inserting valves at needed points in the various lines.

ANNUAL REPORT

CONCLUSION

In concluding this report, I wish to extend to the other members of the department my earnest appreciation of their loyal support and efficient work, of the co-operation of the other city departments, and for the consideration shown by members of the Board of Aldermen, and His Honor the Mayor, Arthur W. Perkins.

Respectfully submitted,

R. H. ROYCE,
Commissioner of Public Works.

Report of Commissioner of Public Safety

To the Honorable City Council:

Rutland, Vermont.

Gentlemen:—

I hereby submit my report, as Commissioner of Public Safety, for the year ending December 31, 1931.

FIRE DEPARTMENT

This report contains the membership, record of alarms, the cause thereof, the value of property at risk, the insurance carried and the damage or loss as near as could be ascertained.

The personnel of the Fire Department consists of One Chief Engineer, one Deputy Chief Engineer, two Captains, thirteen privates and seven call men. The apparatus consists of one 75 ft. aerial ladder truck, one combination chemical and hose truck, two triple combination trucks with pumps of 750 gallons capacity, all of American LaFrance make. Also one Cadillac service truck which was purchased at a cost of \$460.00 to replace the Buick truck which had outlived its usefulness.

During the year the Department answered 214 alarms as follows:—

Telephone, 179; box alarms, 30; verbal, 3; Thermostat, 2.

Value of property at risk was \$1,231,665.45.

Total insurance carried on same was \$1,069,588.43.

Insurance paid was \$176,516.39.

Loss not insured was \$6,220.00.

Total loss for the year, \$182,736.39.

This is the largest loss since 1924 and this large loss was due to three fires:—The Montgomery-Ward Co., and two fires at the Fair Grounds. Outside help was called in for these three fires as a precaution as sparks and burning embers were flying a considerable distance.

I wish to thank the West Rutland and Proctor Fire Departments for their services and to congratulate them on their promptness in responding to the alarms.

During the year three firemen were injured and two women received minor burns, one from cleaning with gaso-

line and one from a back draft from a stove. Leo Hutchins, a lineman employed by the Central Vermont Public Service Corp., was electrocuted while at work during the fire at the Automobile building at the Fair Grounds. In addition to the 241 alarms, firemen responded to 21 special service calls, such as taking cats from trees, shutting off ammonia leaks, gaining entrance by ladders when owners had locked themselves out, and use of inhalator on a Polio victim. Also covered a hole in a roof during the blizzard of March 8th, when the wind blew a skylight off.

During the blizzard about two miles of fire alarm wire was blown down and five fire alarm boxes were burned out. Three of these were repaired and two were replaced by new ones. When the line was rebuilt it was extended through Lafayette St., so new boxes could be added in that section when in a position to do so. One new box, No. 85, was installed at Lafayette St., and Killington Ave.

The inventory value of the Fire Department is \$64,643.55 and the cost of operation for 1931 was \$41,543.34.

POLICE DEPARTMENT

The Police Department is composed of the Chief of Police, 14 Patrolmen and 56 special officers.

322 arrests were made for various causes during the year, 28 more than in 1930. 198 were for intoxication, 27 for violation of auto laws, 28 for breach of peace, 4 for burglary in the night time, 15 for larceny and the balance for various offences.

During the year 2,158 lodgings were applied for and given, which is the largest in history.

4 automobiles were reported stolen. They were all recovered and returned to their owners.

118 business places were found open and taken care of by the officers.

During the year 28 miscellaneous thefts were reported.

During the year the officers reported 50 street lights out.

The Police Wagon answered 187 calls in which arrests were made, and answered a total of 352 calls. \$187.00 was turned into the City Court account by the Patrol Wagon.

The new Indian Motor-cycle is giving good service and has now been driven a total of 4,037 miles.

New traffic lights were installed on the corner of State St. and Merchants Row, also at West Street and Pine.

Through Street Stop signs were installed on all the streets from Merchants Row to the Reformatory on State Street and are working out wonderfully well.

During the year 854 automobiles were tagged for violation of the 1 hour parking law.

An inventory of apparatus and equipment, etc., on hand shows a total of \$7,981.00.

On December 30, 1930 two Sergeants of Police were appointed, one to go on duty for the day and the other for night duty. This change at Headquarters has been in force for a year and has definitely proven that it was a splendid thing for the Department.

Respectfully submitted,

JOHN C. FOX,
Commissioner of Public Safety.

ALFRED H. KOLTONSKI,
Chief Engineer.

Report of City Attorney

To the Honorable City Council:

I, herewith, submit my report as City Attorney for the year ending December 31st, 1931.

The legal action in which the City was involved as Trustee as a result of the contract with Clarence T. Rocheford, Inc., for the building of the High School is still pending in The United States District Court in Boston and in the United States District Court for Vermont. The litigants have made some progress towards adjusting their difficulties and no claim is made against the City of Rutland, except as Trustee of the funds due Clarence T. Rocheford, Inc., which corporation is now in bankruptcy.

There is pending an action brought by Walter W. Seward against the City of Rutland involving the cutting of timber on City Lands, which are claimed by Seward as his property. The matter will probably come up for hearing at the March Term of Rutland County Court.

I have cooperated with the Tax Collector of the City in the collection of delinquent taxes and have advised and assisted him in the adjustment of some of these matters.

During the year several insane paupers and drug addicts have been removed to the Waterbury Retreat at the expense of the State, through the efforts of the Overseer of the Poor and the City Attorney, and the City has, thereby, been relieved of liability for their care.

The depression and increased calls upon the Charity Department have made more work in connection with the Department of the Overseer of the Poor and I have, during the year, advised and counselled with him and have assisted him in his work and in his investigations and, on several occasions, our labor has resulted in substantial saving for the Poor Department by causing the expense of certain paupers charged to other communities.

I have cooperated with the Chief of Police and his Department during the past year, and have assisted them wherever necessary.

During the year I have been called upon and have performed various routine services for the different City Officials, Heads of Departments and Committees of the Board of Aldermen, and have counselled with and advised them from time to time.

I have enjoyed complete cooperation from the various City Officials and Committees and very much appreciate the willing and helpful spirit with which all City Officials and members of the committees have gone about the work entrusted to us during the year.

Respectfully submitted,

CHARLES E. NOVAK,
City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I herewith submit my report as Overseer of the Poor for the year ending December 31, 1931.

October, November and December Hospital bill 1930 paid in January 1931. Amount \$1,786.33.

During the past year assistance has been given to 335 outside poor families at a total cost of \$24,387.43, which is an average per capita cost of \$72.80. This compares with a total of \$14,829 90 and an average of \$57.18 furnished to 255 families during the preceding year.

During the past year we had an average of 41 inmates at the Farm and food cost a total of \$3,210.72 or \$78.31. During the preceding year we had an average of 35 inmates with a per capita cost of \$92.10 and a total food cost of \$3,223.67.

Transients to the number of 1026 were given a night's lodging, supper and breakfast. This compares with 897 transients who were similarly cared for during the preceding year.

The Inventory of live stock, farm implements, etc., shows a total of \$5,694.91, an increase over last year's inventory which was \$5,327.66. The complete itemized inventory is on file in the office of the City Treasurer.

During the year just closed the property owned by the City at the Poor Farm has been kept in good condition and all minor and necessary repairs have been properly taken care of. The Poor Farm itself produced all its own milk and vegetables and a part of the meat and butter required for the table.

All of the labor, with the exception of \$48.50 paid for farm and house labor, was performed by the inmates.

As usual we have, during the past 12 months, taken every precaution possible to insure proper, sanitary and healthful conditions at the Farm.

The unemployment situation and general conditions of distress and depression, which we encountered in the 1930 year have continued unabated during the past 12 months. These have added greatly to the number cared for at the Farm although this cost, even taking into consideration the greater number cared for, has been reduced rather than increased. The greater expense which we have encountered during the past 12 months has been the care for the poor outside of the Poor Farm. In spite of all the efforts of different organizations in the community, a great number of persons were in distress and unprovided for during the first four months

of 1931 and their care required the expenditure of a considerable amount.

During the past year we have had the assistance of various officials, including the Board of Charities and Corrections of the Board of Aldermen, who have worked and cooperated with your Overseer and all by their experience, sympathy and help have come to a better understanding of the poor conditions as they existed. Their cooperation has been appreciated and has assisted in some measure in reducing the amount paid to the outside poor and at times when the capacity of the department had been overtaxed they have rendered invaluable assistance in the investigation of cases.

We have strived our best to take adequate care of our poor at a minimum cost to the City and have on all occasions had the cooperation assistance and help of every City official including much helpful aid, assistance and real understanding from Mayor Perkins and these connected with his administration.

In closing this report we wish to express our appreciation to the City Officials and all agencies interested in the work of relieving the poor for the assistance given.

Respectfully submitted,

FRANK W. DIGNAN,
Overseer of the Poor.

Report of District Nurse

To the Honorable City Council:

I, hereby, submit the following report as District Nurse for the year ending December 31, 1931:

During the year there have been 1975 nursing visits made, 29 maternity cases cared for with 58 prenatal and 120 post-natal calls. 15 full layettes have been given expectant mothers. Supplies of medicine, clothing and shoes have been given in 164 families and milk supplied daily in one home the entire year. Ten all night visits have been made.

Owing to general conditions in the city, as elsewhere, it has been necessary to spend many hours in welfare work. 300 such calls have been made and 15 relief meetings attended. The first week of September we had charge of the nursery at the Fair in connection with the Red Cross first aid work. Our nicely furnished and well equipped rooms were a convenient place for mothers with infants and small children to rest and was a much appreciated privilege.

The Thanksgiving and Christmas seasons were occasions of rejoicing and returning thanks for the generosity of the good folks of our city in supplying warm clothing and well filled baskets of good things for those families out of work and where there was illness. The citizens, church groups and clubs have been most loyal and generous in their support of the work done by the Rutland Missionary Society through the nurse, thereby making the year one of success. We would thank one and all for their generous support and cooperation.

The expense of the year's work is as follows: For salary \$1200, transportation \$50, and supplies \$120. This has been met by an appropriation of \$300 from the city, from the annual canvass of the wards and from patients fees.

Respectfully submitted,

LUCIE P. CLARK,
District Nurse

Report of Health Officer

To the Honorable City Council:

Gentlemen:

I herewith submit my report for the year ending Dec. 31, 1931. The following communicable diseases were reported:

Whooping cough	261
Chicken Pox	112
Mumps	11
Scarlet Fever	9
Measles	8
Poliomyelitis	3
Diphtheria	2
German Measles	1
<hr/>	
Total	407

The Board of Health met regularly on the third Thursday of the month; under their direction a Diphtheria immunization was begun on children in the first three grades of school.

Appropriations were made by the City Council and 477 children were given Toxin Anti-toxin which was furnished by the State Board of Health, and administered by local physicians, at a cost to the city of \$542.37.

The Board of Health recommend, that the immunization be continued, each year, on children entering the first grade of Public or Parochial schools.

Regular inspections of the water-shed were made with Mr. R. H. Royce, Commissioner of Public Works, and on July 28th with Mr. Moat, State Chemist, and Mr. Waterman, State Sanitary Engineer, representing the State Board of Health.

In September, owing to the taste and odor of the water, it was found necessary to clean the reservoir. The condition was presumably due to weed growth. The work was done under the direction of Mr. Beardsley, Supt. of Water Works, assisted by the Fire Department.

The Board of Health recommend that, as soon as it is practical to do so, the reservoir be cemented, in order that a

similar condition be avoided. This would materially lessen the cost of cleaning, which should be done annually.

Samples of water were taken daily from the swimming pool, while in operation, and sent to the Department of Hygiene for examination. These tests show attention to detail which is necessary to insure a healthful condition.

598 city inspections were made. These consist of routine work and complaints made to the Health Department, and 174 inspections with Fire Department.

46 plumbing inspections, consisting mainly of new work, were recorded.

Respectfully submitted,

CLARE M. COLE,
Health Officer.

Report of Milk Inspector

To the Honorable City Council:

Gentlemen:

I herewith submit my report for the year ending Dec. 31, 1931:

Total number of dairy and creamery inspections, 928.

Samples of milk and cream sent to the Department of Hygiene for examination, 691.

178 butterfat tests of milk and cream were made at various creameries together with 276 lacto-densimeter and sediment tests. Experimental samples were taken at intervals.

The following licenses were issued:

Producers	76
Retailers	88
Peddlers	9
Creameries	3
Wholesalers	2
Total licenses issued	178

Owing to the change in time of issuing licenses as provided in the revised Milk Inspection Ordinance, only one-half of the regular license fee was collected from those who held licenses in 1930; as a result the sum of only \$225.00 was turned over to the City Clerk.

Several new creameries have been built during the year. Milk is now Pasteurized at five plants which supply milk for the city.

The high quality of Pasteurized and raw milk sold in the City of Rutland is shown by the monthly reports of tests which are published in the Rutland Herald.

Respectfully submitted,

CLARE M. COLE,
Milk Inspector.

Report of Department of Public Health

Statistics for 1931 compiled from certificates filed in the City Clerk's Office.

		\$3,012 35

EXPENDITURES

Maintenance:

Pay rolls	\$1,694 10	
Lights, etc.	382 86	
Sundry expenses	282 36	
		\$2,359 32

Improvements:

Matting, paint, bubblers, sign, etc.....	428 70	2,788 02
--	--------	----------

Balance		\$224 33
---------------	--	----------

Attendance, 1931:

Paid admissions	14,250	
Free admissions	16,171	
		30,421

Attendance, 1930		25,962
------------------------	--	--------

Increase		4,459
----------------	--	-------

Free morning admissions, 1931	16,171	
-------------------------------------	--------	--

Free morning admissions, 1930	10,106	
-------------------------------------	--------	--

Increase		6,065
----------------	--	-------

The increase in number of free admissions is due to having free admittances six mornings instead of three and this also accounts for part of the decrease in receipts.

Respectfully submitted,

WALTER L. GUSTAFSON,
Manager.

Report of Inspector of Buildings

To the Honorable City Council:

I herewith submit the following report for the year ending December 31, 1931:

CIGRID B. PATCH,
Treasurer.

I have examined the above accounts and find them correct
as stated.

CORNELIA C. PERKINS,
Auditor.

Report of Board of School Commissioners

To the Mayor, Board of Aldermen and Citizens of the City of Rutland:

The annual report of the Board of School Commissioners deals with some of the important accomplishments of the year just past and presents the financial program for the year just beginning.

Economy in the expenditure of public funds is probably the matter of greatest interest just now. In spite of the fact that our actual income was \$2,300 less than we anticipated, we have closed our books for 1931 with a balance. We carried over unpaid bills amounting to \$430 but about \$700 was due us in tuition. We feel certain that the schools of Rutland have been managed economically for many years and that it will be difficult to make any further cuts in the budget without seriously handicapping our children.

The budget of the school department for 1932 calls for an expenditure of \$187,601 which is approximately the same as last year. This budget shows a saving on several items so that the additional pupils in the high school will not increase the total cost.

The tax rate of \$1.15 which has been voted for school purposes for the past five years will not be sufficient this year. The last Vermont General Assembly repealed the tax on intangibles and by so doing reduced the income of the schools of Rutland about \$12,000. We find it necessary, therefore, to ask the voters to approve an additional tax of 12 cents on the dollar of the grand list to make up for this loss and to balance the budget.

Last year the voters approved a special tax of five cents for the repair of school buildings. The income from this tax, \$7,210.37, plus \$79.51 from the general account, was spent as follows:

Walks and curbs at Dana, Longfellow and Kingsley Schools	\$1,011 24
Outside painting and interior decoration at Longfellow and Madison Street Schools	3,598 00
Upkeep of grounds at High School and Kingsley School	335 93

New blackboard at Madison Street School.....	186 05
Fences at Longfellow and Park Street Schools.....	476 86
Other repairs at Madison Street School	611 53
Other repairs at Longfellow School	568 11
Electric wiring at Madison Street School (balance, \$98.29, paid out of other current income)	150 00
Care of trees and miscellaneous items	352 16
	<hr/>
	\$7,289 88

Over 97 per cent of this money was spent for material and labor in Rutland. We ask to have this tax continued so that our repair program may be carried on and employment furnished the workmen of the city.

The cost per pupil in average daily attendance is regarded as a fair basis of comparison between two school systems or between two periods in the same system. We want to urge a careful study of the comparison of costs per pupil in 1921 and 1931 found on page 191. You will find first, that the cost per pupil on account of salaries has increased from \$48.50 to \$64.65, or 33 $\frac{1}{3}$ per cent; second, that the cost of all other items has increased from \$13.83 to \$15.20 (including special 5 cent tax for repairs) or 10 per cent since 1921. In the list of salaries the increase has been slight with an actual decrease in the case of the high school principal.

In the list of services other than salaries, one half the items, not including the evening school of 1921 or the library books for 1931, are less in 1931 than in 1921 not including the most striking example of the decrease found in the cost of fuel. In 1921 it cost \$5.33 to keep a pupil warm in school for a year while in 1931 it cost \$2.77 for the same period of time. Text books and supplies show a decrease of 38 cents and 21 cents respectively in the ten year period. The average cost of insurance in 1931 is about double the cost in 1921 but we are buying about three times as much protection in the latter year. The increased cost for electric lights and telephone service means that these services were not furnished to many children in 1921. Parents were spending their money for glasses instead of light and the city was paying to have children repeat the grade.

During bad times children stay in school longer and therefore increase the numbers in the upper grades where the cost is highest. There are at the present time about twenty-five post graduates at the high school which is three times the normal number. We believe that the children who happen to be attending school in bad times have as much right to a good education as the children who attend school in good times. So long as there is a constant and increasing demand for schooling, we must make every effort to keep the business of the schools up to normal.

We believe that expenditures should be carefully watched and that we should eliminate unnecessary services. But we also firmly believe that the welfare of the children is the most important thing.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS,
By JOSEPH F. CRONAN, President

Rutland, Vermont, February 1, 1932.

N. B.—At a special meeting of the Board of School Commissioners held February 9, 1932, it was decided to withdraw the special five cent tax for repairs and to reduce the twelve cent tax to ten cents.

—J. F. C.

Report of the Superintendent of Schools

To the Board of School Commissioners, the Mayor, the Board of Aldermen and the Citizens of the City of Rutland:

I have the honor of submitting to you the thirty-ninth annual report of the Rutland Public Schools and the eleventh under the present administration.

Our philosophy of education urges us to believe that if the men and women of tomorrow are to possess certain desirable habits, attitudes and skills, they must begin to practice them today. We have attempted to arrange affairs in a way that will encourage each child to participate in the various activities of the school, the teacher becoming more and more a leader of a group traveling along the road of life and less and less a boss directing and commanding.

In the primary grades the stage is set so that self reliance will have a chance to develop. Every day there is a conscious effort made to have these small folks find a solution of their own problems. They soon learn to manage their own wearing apparel, become accustomed to a strange large building, and learn to play their part in a large group of children. During the first two years the children acquire considerable independence in free reading and learn to make wise selections to read to the class.

As the child advances through the grades, he is encouraged to discover for himself the answers to the hundreds of questions which arise daily. Each lesson period is regarded as an opportunity for the child to accumulate a greater degree of self reliance by finding ways to adjust himself to the social customs of his own group.

In the high school the program is organized so that large numbers of students are given important tasks, intended to bring out and develop self assurance. Domestic science, manual training, and drawing give the pupils a chance to select their own projects and, to a considerable degree, carry them out in their own way. Athletics, dramatics, musical organizations, the school paper and many other enterprises furnish avenues for growth to many types of young people.

The success of children in completing a full grade of work each year is a matter of great importance. Each child that fails must repeat the grade which means that the city pays good money to re-educate him. The effect of failure on the child is of more importance, however, because it is possible to get the habit of failure with a consequent impairment of personality. The age grade table on page 195 shows that 63.3 per cent of the children in the schools are of normal school age, 26 per cent are younger than normal and only 10.7 per cent are over age. The degree of overageness is slight as shown by the fact that only four children in the elementary schools are over fourteen years of age, that only three children in the intermediate school are over sixteen years of age; and that only three pupils in the high school, not including post graduates, are over nineteen years of age.

The principal of a school is the natural guide and counselor of pupils, teachers, and parents who look to him for effective and intelligent leadership. For six years our high school prospered under the energetic leadership of Leslie O. Johnson who asked to be released last August in order to accept a promotion, by appointment, to the principalship of the high school at Gloucester, Massachusetts. After careful consideration of a number of candidates, some of whom had excellent qualifications, it was decided to appoint Frank W. Mayo to the principalship of Rutland High School. Mr. Mayo has already proved that he possesses, in a high degree, the qualifications which insure success in this important position.

There is a growing conviction that the teachers of American children ought to be selected with the utmost care and given a training which will adequately fit them for this important work. The time will come when society will insist that the teachers shall be given a training of several years duration to be followed by service for, say, two years as a probationer under experienced supervision. Under present conditions it takes at least five years, after graduation from college or normal school, to develop a valuable teacher.

The teachers of Rutland, because of a personal desire to improve and because the suggestion to improve has been strong, have worked diligently to advance their professional standing.

During the last four years 82 teachers have attended summer school and about an equal number have taken extension courses. The schools attended are:

University of Vermont	37
New York State College	4
University of Rochester	1
Columbia University	15
Ohio State College	1
Bates College	1
L'Alliance Francaise	2
Mass. Institute of Technology	3
Harvard University	3
University of New Hampshire	3
Syracuse University	2
Springfield College	1
Cornell University	2
Boston University	1
McGill University	1
Castleton Normal School	1
Clark University	1
International Y. M. C. A. College	2

The Parent-Teacher Associations of the city rank high as agencies for the promotion of good will and understanding and the contributions they make to the material comfort and well being of the children are numerous. They buy milk for the undernourished, provide glasses where vision is poor, pay for operations, secure books for our libraries, and furnish pictures for our school rooms. They sponsor and help to provide social activities under wholesome conditions; they encourage scholarship by aiding high school graduates to continue their education; and, most important of all, they help to develop a spirit of co-operation between the school and the home.

The public school has never received gifts of money, or land, or buildings from private individuals in anything like the amounts that might be expected. Many people have considerable attachment for the schools of their childhood but their affection is seldom translated into money. The schools of Rutland have, this year, received several gifts which were highly appre-

ciated. These gifts helped to supply a real need and were large in relation to the resources of the givers.

The Class of 1931 and the local branch of the National Honor Society gave over one hundred dollars for shrubbery to beautify the high school grounds. The Rutland University Association gave over three hundred dollars for the purchase of standard fiction for the high school library.

Although life in America and over all the world is undergoing sweeping and profound changes, let us maintain the high standard which has characterized our schools for many years, for children live and grow today.

Respectfully submitted,

W. W. FAIRCHILD,
Superintendent.

Rutland, Vermont, February 4, 1932.

Statistical Report of the
Rutland Public Schools

RUTLAND PUBLIC SCHOOLS
FINANCIAL STATEMENT FOR THE FISCAL YEAR ENDING
DECEMBER 31, 1931

PER PUPIL COST FOR SCHOOL YEAR ENDING
JUNE 30, 1931

Total current expenses all schools less book rebate and capital outlay.....	\$180,736 96
Total current expenses High School less book rebate and capital outlay.....	\$70,862 51
Total current expenses Meldon School, Grades 7 and 8, less capital outlay.....	32,207 33
Total current expenses elementary schools, Grades 1-6, less capital outlay.....	77,667 12

(Per Pupil costs are figured on the basis of Average Daily Attendance)
(High School 713.8—Meldon 403.1—Elementary 1288.6)

Average cost per pupil, all schools, not including book rebate and capital outlay.....	\$75 13
Average cost per High School pupil not including book rebate and capital outlay.....	99 27
Average cost per pupil Grades 7 and 8, not including capital outlay.....	79 88
Average cost per pupil, Grades 1 to 6, not including capital outlay.....	60 27
Total expenses for free text books and supplies.....	\$7,806 72
Average cost per pupil for free text books and supplies.....	3 24

DISTRIBUTION OF PERSONS OF SCHOOL AGE

Males.....	1756
Females.....	1899
Children between 6 and 8, August, 1931.....	607
Children between 8 and 16, August, 1931.....	2399
Children between 16 and 18, August, 1931.....	649
	3655
	3655

ENROLLMENT AND ATTENDANCE SINCE SEPTEMBER, 1931

Number enrolled in public schools.....	2558
Average membership.....	2501.5
Enrollment in parochial schools.....	1207
Enrollment in public and parochial schools.....	3765
Less pupils enrolled twice.....	30
Net total enrollment.....	3735

The table on the opposite page shows the cost of the various services rendered by the schools to the children of the city in 1931 and compares those costs with the same items in 1921.

The total cost was divided by the number of pupils in average daily attendance to get the cost per pupil. The average daily attendance used was:

	June 1921	June 1931
All schools.....	1794.5	2405.6
Grades 1 to 8.....	1371.5	1691.8
High School.....	423.	713.8

For further information it may be observed that,

- 1—A part of the salary of the high school principal was charged to teaching in 1921, because part time was given to that service.
- 2—The cost of the truant officer includes the cost of taking the census in 1921 and 1931.
- 3—The salary of the superintendent for 1921 is at the rate of \$2,800 a year for six months and at the rate of \$3,500 a year for six months.
- 4—The schools were not equipped for artificial lighting or telephone service, except the high school, in 1921; hence the cost was small that year.
- 5—The insurance carried on all school property in 1921 was \$114,400. In 1931 this protection had been raised to \$325,000, or nearly three times as much. The cost of insurance was low in 1931. The average cost is about \$1,628 per year, or 67.7 cents per pupil per year.
- 6—The special appropriation of \$7,210.37 is not included in repair of buildings for 1931. This sum is equal to a cost of \$2.99 per pupil.
- 7—The costs used on the opposite page are for the fiscal year and will, therefore, differ from the similar figures for the school year. The cost per pupil in the annual report for 1921 is based on average membership which gives a lower cost than a cost based on average daily attendance.

THE COST OF PROVIDING VARIOUS SCHOOL SERVICES TO
ONE PUPIL FOR A YEAR IN 1931 COMPARED WITH THE
COST IN 1921

Salaries	1921		1931

Report of Auditors

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, and Sinking Fund Commissioners from January 1, 1931, to December 31, 1931, inclusive, and we hereby certify that, IN OUR OPINION, they have duly accounted for all monies received by them and they have proper vouchers for all monies expended.

We find the record of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the books of the City Treasurer. We have checked the cash and verified the bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners, and found them to be correct.

The books of the City Treasurer are in their usual excellent condition and very clearly show the city's true financial condition on December 31, 1931, and the result of operations for the twelve months' period then ended.

Respectfully submitted,

EARLE L. TOWER,
GEO. A. SABIN,
JOHN W. BURKE,

City Auditors.
